

AMENDMENT TO THE SPECIFICATION

Per the Examiner's Request, the Specification is Amended to include the Brief Description of the Drawings, inserted at the bottom of page 11 of the Specification, that text stating:

"Figure 1 is a graphical representation of how a business adapts current operational wisdom to this embodiment of the invention.

Figure 2 outlines the major steps of the method described in this embodiment of the invention.

Figure 3 is a general outline of how a computer program instantiating this embodiment of the invention can be created out of pre-existing, state of the art tools.

Figure 4 is a graphical representation of the process flow that might result from this embodiment of the invention for a particular dynamic process (or business).

Figure 5 is a graphical representation of how, upon experiencing the logical contradiction set forth in Figure 4, the preferred embodiment of this invention uses the feedback to modify the method at the level where the contradiction is experienced."
